## **Ashcraft's Pediatric Surgery**

By Holcomb, Murphy

Elsevier, January 2010

Hardback 1128pp h280mm x w219mm x s51mm 2812g

ISBN 9781416061274

6.550 Kč

Acclaimed for its unsurpassed readability and manageable scope, "Ashcraft's Pediatric Surgery" presents authoritative, practical guidance on treating the entire range of surgical problems in infants, children, and adolescents. The new 5th Edition continues this excellent legacy with its thoroughly updated coverage of today's hot topics including the increased use of minimally invasive surgery (MIS) for pediatric patients, urology, bariatric surgery in adolescents, and evidence-based treatments and outcomes in children. Expert Consult functionality - new to this edition - offers convenient access to the complete contents of the book, along with bonus surgical videos that demonstrate many of the new techniques and procedures from the text to help you refine your skills.

## **Emergency Surgery**

By Adam Brooks, Bryan Cotton, Nigel Tai, Peter Mahoney

John Wiley, April 2010

Paperback 228pp

ISBN 9781405170253

1.580 Kč

This concise guide provides a clear account of the key issues involved in the assessment, investigation, resuscitation, and management of patients who present to the on-call surgical team. The authors discuss anesthesia, pre-op resuscitation/optimization, and initial post-operative care (including preliminary high dependency/critical care), as well as the complications and acute issues of hospitalized patients. Important sections on 'trouble shooting' and 'common pitfalls' help you save precious time.

### **Hunt & Marshall's Clinical Problems in Surgery**

By Smith, Fox, Saunder Yii

Elsevier, May 2010

Paperback 608pp h265mm x w190mm

ISBN 9780729538268

2.310 Kč

Hunt & Marshall's Clinical Problems in Surgery discusses common problems encountered in the clinical practice of surgery and how to solve and treat them. The approach of the text will be to encourage diagnostic economy, and to this end students will be assisted to develop skills in pattern recognition, appreciation of the natural history and prognosis of individual problems and their causative diseases, and an ability to come to the core of the patient's presenting problem, while maintaining an holistic approach to the unique requirements of the individual patient. The text is designed to help the student understand the questions raised at each level of the of the diagnostic, therapeutic and overall decision making tree and thereby to construct an appropriate pathway of management for each clinical problem.
